

Temperature controllers

1/16 DIN - 48 x 48 mm

gammadue® series M1-M3 lines

Flexible, easy and comprehensive

These two 48x48 size controllers of the gammadue® series, are suitable for a wide range of applications.

The M1 can be used as a simple controller while the M3 performs Heat/Cool control and provides on auxiliary current transformer input.

Easy configuration and a simple operating method are merged with the typical characteristics of more complex devices like:

autotune, IP65 front panel protection, serial communications, analogue retransmission output, custom linearisation, transmitter power supply, Start-up and Timer special functions.

Special functions

To improve the instrument performance and to reduce the wiring and installation costs, two special functions are available:

- Start-up

- Timer

The use of these functions avoids additional device installation (e.g. external timer), therefore allowing a significant costs reduction.

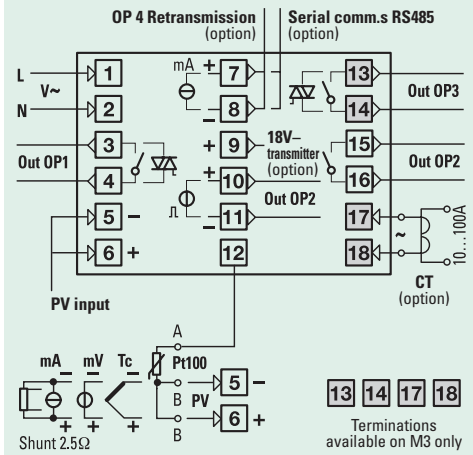

Moreover there are:

- **Keypad lock/unlock** function, to avoid incorrect operator actions
- **Outputs lock/unlock** function, at any moment it is possible to stop the control action, but not the process variable display, without switching-off the power supply.
