Large Diaphragm Pressure Switches

Visual Set Point Adjustment in 5 Standard Ranges,
0.05" to 12" w.c. Repetitive Accuracy within $\pm 1\%$

Our highest precision conventional large diaphragm pressure switch provides maximum dependability. In addition, it incorporates a visible set point indicator for maximum convenience. UL and CSA listed, FM approved for general service, these switches are suitable for most applications in air conditioning and industrial service. Electrical capability of 15 amps handles most small electrical loads.

Special Models Available

Environmental (MIL) Construction. Unlisted Model 1635 can be furnished with a special snap switch sealed against the environment for high humidity, exposure to fungus, and/or for military applications. Similar to Model 1638 except dead band is slightly greater and some lower set points may not be available. Specify Model 1635 – (Range No.) – “MIL” and required set point in ordering.
