SITOP BUF8600 10S/40A SITOP BUF8600 10s Buffer

SITOP BUF8600 10s Buffer module for PSU8600 Buffer capacity 10 s/40 A with double-layer capacitors maintenance-free

Mains buffering	
Type of energy storage	Double-layer capacitors
Design of the mains power cut bridging-connection	Backup time with 40 A load current: 10 s
Buffering time for rated value of the output current in	10 000 ms
the event of power failure	
Output	
Output current	
Rated value	40 A
Signaling	
Display version	3-color LED for operating state module
<ul> <li>for normal operation</li> </ul>	LED green for "buffer standby exist"
• in buffering mode	LED yellow for "buffered mode"
Interface	
Design of the interface	Ethernet/PROFINET via power supply unit PSU8600
Safety	
Operating resource protection class	Class III
Certificate of suitability	

	Yes
• CE marking	cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259;
<ul> <li>as approval for USA</li> </ul>	cCSAus (CSA C22.2 No. 107.1), File E 197259, cCSAus (CSA C22.2 No. 60950-1, UL 60950-1)
<ul> <li>relating to ATEX</li> </ul>	IECEx nA IIC T5 Gc; ATEX (EX) II 3G Ex nA IIC T5 Gc; cCSAus
	(CSA C22.2 No. 213, ANSI/ISA-12.12.01) Class I, Div. 2, Group
	ABCD, T5
• C-Tick	No
Type of certification CB-certificate	Yes
Shipbuilding approval	ABS, DNV GL
Protection class IP	IP20
EMC	
Standard	
<ul> <li>for emitted interference</li> </ul>	EN 55022 Class B
<ul> <li>for interference immunity</li> </ul>	EN 61000-6-2
- -	
environmental conditions	
Ambient temperature	25 CO °C with actual convection
during operation	-25 +60 °C; with natural convection
during transport	-40 +70 °C
• during storage	-40 +70 °C
Environmental category acc. to IEC 60721	Climate class 3K3, 5 95% no condensation
Mechanics	
Mechanics Type of electrical connection	Plug-in terminal with screw connectors
	Plug-in terminal with screw connectors
Type of electrical connection	
Type of electrical connection <ul> <li>at input</li> </ul>	- - X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1
<ul> <li>Type of electrical connection</li> <li>at input</li> <li>at output</li> <li>for control circuit and status message</li> </ul>	-
Type of electrical connection <ul> <li>at input</li> <li>at output</li> <li>for control circuit and status message</li> </ul> Type of connection to system components	- - X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1 screw terminal each for 0.2 1.5 mm <sup>2</sup> Via integrated connector
Type of electrical connection <ul> <li>at input</li> <li>at output</li> <li>for control circuit and status message</li> </ul> Type of connection to system components Width of the enclosure	- X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1 screw terminal each for 0.2 1.5 mm <sup>2</sup> Via integrated connector 125 mm
Type of electrical connection         • at input         • at output         • for control circuit and status message         Type of connection to system components         Width of the enclosure         Height of the enclosure	- X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1 screw terminal each for 0.2 1.5 mm <sup>2</sup> Via integrated connector 125 mm 125 mm
Type of electrical connection         • at input         • at output         • for control circuit and status message         Type of connection to system components         Width of the enclosure         Height of the enclosure         Depth of the enclosure	- X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1 screw terminal each for 0.2 1.5 mm <sup>2</sup> Via integrated connector 125 mm
Type of electrical connection         • at input         • at output         • for control circuit and status message         Type of connection to system components         Width of the enclosure         Height of the enclosure         Depth of the enclosure         Required spacing	- X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1 screw terminal each for 0.2 1.5 mm <sup>2</sup> Via integrated connector 125 mm 125 mm 150 mm
Type of electrical connection <ul> <li>at input</li> <li>at output</li> <li>for control circuit and status message</li> </ul> <li>Type of connection to system components</li> <li>Width of the enclosure</li> <li>Height of the enclosure</li> <li>Depth of the enclosure</li> <li>Required spacing <ul> <li>top</li> </ul> </li>	<ul> <li>X1, X2 (control contact) and 13,14, 23, 24 (message signals): 1 screw terminal each for 0.2 1.5 mm<sup>2</sup></li> <li>Via integrated connector</li> <li>125 mm</li> <li>125 mm</li> <li>150 mm</li> <li>50 mm</li> </ul>
