		Switch Actuator Module, 2-fold, 6 A Device for the operation in the Room Controller Basis Device RC/A 8.1. 2 relay outputs with high switching capacity for controlling two independent loads. The following functions can be set separately for each output: - time functions, such as staircase lighting function, ON/OFF delay, flashing - adjustable staircase lighting time - retrieval of scenes via 1-bit and/or 8-bit commands - logic operation - status response - monitoring of telegrams - reaction to threshold values - control of electrothermal valve drives (continuous control) - control of air conditioning devices (convector fans) The device is automatically linked with the supply voltage and incoming supply when it is inserted in the Room Controller Basis Device and assigned to a phase. Outputs — 2, relay contacts Switching capacity Switching current — max. 16 A / AC1, 10 A / AC3 Continuous current — max. 6 A Connection — Plug-in screw terminals Installation — Room Controller Basis Device, any module slot Manufacturer — ABB **Type** — **SA/M 2.6.1** Material: ….
