## Data sheet

## 6BK1942-2AA00-0AA0

SIPLUS HCS4200 POM4220 Lowend with 16 outputs each max. 1449 W (at 230 V AC)

General information		
Product type designation	POM4220 Lowend	
Installation type/mounting		
Mounting type	Screw mounting to rack	
Mounting position	vertical	
Type of ventilation	Self ventilation or forced ventilation	
Supply voltage		
Type of supply voltage	AC	
Rated value (AC)	230 V	
Relative negative tolerance	10 %	
<ul> <li>Relative positive tolerance</li> </ul>	10 %	
Line frequency		
Rated value 50 Hz	Yes	
Rated value 60 Hz	Yes	
Relative symmetrical tolerance	5 %	
Mains buffering		
<ul> <li>Recovery time after power failure, typ.</li> </ul>	1 s	
Connection method		
<ul> <li>Design of electrical connection for supply voltage</li> </ul>	Connector, 3-pole with spring-loaded connection	
<ul> <li>Connectable conductor cross-sections, solid</li> </ul>	1x (0.2 10 mm²)	
<ul> <li>Connectable conductor cross-sections, finely stranded with wire end processing</li> </ul>	1x (0.25 6 mm²)	
<ul> <li>— Connectable conductor cross-sections for AWG cables</li> </ul>	1x (24 8)	
Input voltage		
Design of the power supply	Power supply via rack	
Power		
Active power input, max.	1 W	
Power electronics		
Type of load	Ohmic load	
Power capacity, max.	16.1 kW	
<ul> <li>For phase against neutral with fan at 40 °C, max.</li> </ul>	16.1 kW	
• For phase against neutral without fan at 40 °C, max.	7.3 kW	
Switching capacity current per phase, max.	35 A	
Short-time withstand current (SCCR) acc. to UL 508A	50 kA	
Control of heating elements		
Half-wave control	Yes	
Soft start	No	

Phase control	No
Load connection type	
Star connection with neutral conductor (single-	Yes
phase)	
<ul> <li>Open delta connection (single-phase)</li> </ul>	No
<ul> <li>Closed delta connection (3-phase)</li> </ul>	No
<ul> <li>Star connection with neutral conductor (2-phase)</li> </ul>	No
• 2-pole switching	No
Setpoint input	
Percent	Yes
Watts	No
Heating power	
<ul> <li>Number of digital outputs</li> </ul>	16
<ul> <li>Number of heating elements per output, max.</li> </ul>	1
<ul> <li>Output voltage for heating power</li> </ul>	230 V
<ul> <li>Power carrying capacity per output, min.</li> </ul>	40 W
<ul> <li>Power carrying capacity per output, max.</li> </ul>	1 449 W
— for heating elements with high inrush current,	750 W
max.	
<ul> <li>Output current for heating power</li> </ul>	6.3 A
Melting I2t value	57 A <sup>2</sup> ·s
<ul> <li>Design of short-circuit protection per output</li> </ul>	Safety fuse 6.3 A
<ul> <li>Design of overvoltage protection</li> </ul>	Transil Diode
Connection method	
<ul> <li>Design of electrical connection at output for heating and fan</li> </ul>	Connector, 8-pin with tension spring connection
<ul> <li>— Connectable conductor cross-sections, solid</li> </ul>	1x (0.2 10 mm²)
<ul> <li>Connectable conductor cross-sections, finely stranded with wire end processing</li> </ul>	1x (0.25 6 mm²)
<ul> <li>Connectable conductor cross-sections for AWG cables, stranded</li> </ul>	1x (24 8)
Interfaces	
Internaces	
Interfaces/bus type	system interface
Interfaces/bus type	system interface
Interfaces/bus type Interrupts/diagnostics/status information	system interface
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays	
Interfaces/bus type Interrupts/diagnostics/status information	19
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays	19 LED green = ready, LED yellow = heating on/off, LED red = error
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure • Triac error	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure • Triac error • Switch-off threshold for internal device temperature	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure • Triac error • Switch-off threshold for internal device temperature • Parallel-connected heating elements	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure • Triac error • Switch-off threshold for internal device temperature • Parallel-connected heating elements • Rotating field fault	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure • Triac error • Switch-off threshold for internal device temperature • Parallel-connected heating elements • Rotating field fault • Communication error	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses • Fuse blown • Load failure • Triac error • Switch-off threshold for internal device temperature • Parallel-connected heating elements • Rotating field fault • Communication error • Supply voltage not connected	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range Frequency outside the permissible range	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses      Fuse blown     Load failure     Triac error     Switch-off threshold for internal device temperature     Parallel-connected heating elements     Rotating field fault     Communication error     Supply voltage not connected     Line voltage outside the permissible range     Frequency outside the permissible range     Fault current too high	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range Frequency outside the permissible range Fault current too high Integrated Functions	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range Frequency outside the permissible range Fault current too high Integrated Functions Monitoring functions	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes Yes Yes Yes Ye
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range Frequency outside the permissible range Fault current too high Integrated Functions Number of status displays	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses      Fuse blown     Load failure     Triac error     Switch-off threshold for internal device temperature     Parallel-connected heating elements     Rotating field fault     Communication error     Supply voltage not connected     Line voltage outside the permissible range     Frequency outside the permissible range     Fault current too high Integrated Functions     Temperature monitoring     Type of temperature monitoring	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes Yes Yes
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses      Fuse blown     Load failure     Triac error     Switch-off threshold for internal device temperature     Parallel-connected heating elements     Rotating field fault     Communication error     Supply voltage not connected     Line voltage outside the permissible range     Frequency outside the permissible range     Fault current too high Integrated Functions     Temperature monitoring     Type of temperature monitoring Measuring functions	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes Yes Yes Yes Ye
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range Frequency outside the permissible range Fault current too high Integrated Functions Temperature monitoring Type of temperature monitoring Voltage measurement	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes No Yes Yes Yes Yes Yes Yes No No No
Interfaces/bus type Interrupts/diagnostics/status information Number of status displays LED status display Diagnostics function Diagnoses  Fuse blown Load failure Triac error Switch-off threshold for internal device temperature Parallel-connected heating elements Rotating field fault Communication error Supply voltage not connected Line voltage outside the permissible range Frequency outside the permissible range Fault current too high Integrated Functions Nonitoring functions Voltage measurement Voltage measurement Voltage measurement	19 LED green = ready, LED yellow = heating on/off, LED red = error display, LED red = error for each channel Voltage diagnostics Yes Yes Yes Yes Yes Yes Yes Ye

Design of electrical isolation	Optocoupler and/or protective impedance between main circuit and PELV
between the outputs	No
Isolation	
Overvoltage category	III
EMC	
EMC interference emission	Limit value in accordance with IEC 61000-6-4:2007 + A1:2011
Electrostatic discharge acc. to IEC 61000-4-2	4 kV contact discharge / 8 kV air discharge
Field-related interference acc. to IEC 61000-4-3	10 V/m (80 1 000 MHz), 3 V/m (1.4 2.0 GHz), 1 V/m (2.0 2.7 GHz)
Conducted interference due to burst acc. to IEC 61000-4- 4	2 kV power supply lines, 2 kV load lines
Conducted interference due to surge acc. to IEC 61000-4- 5	Supply and load lines: 1 kV symmetrical, 2 kV asymmetrical
Conducted interference due to high-frequency radiation acc. to IEC 61000-4-6	10 V (0.15 80 MHz)
Standards, approvals, certificates	
CE mark	Yes
UL approval	Yes
RCM (formerly C-TICK)	Yes
KC approval	Yes
EAC (formerly Gost-R)	Yes
China RoHS compliance	Yes
Ambient conditions	
Ambient temperature during operation	
● min.	0°C
● max.	55 °C
Ambient temperature during storage/transportation	
• Storage, min.	-25 °C
Storage, max.	70 °C
• Transportation, min.	-25 °C
Transportation, max.	70 °C
Air pressure acc. to IEC 60068-2-13	
• Operation, min.	860 hPa
• Operation, max.	1 080 hPa
• Storage, min.	660 hPa
Storage, max.	1 080 hPa
Altitude during operation relating to sea level	0.000 m
Installation altitude above sea level, max.  Relative humidity	2 000 m
,	95 %
<ul> <li>Operation at 25 °C, max.</li> </ul>	
● Operation at 50 °C, max.	50 %; 95 % at 25 °C, decreasing linearly to 50 % at 50 °C
Vibrations	
<ul> <li>Vibration resistance during operation acc. to IEC 60068-2-6</li> </ul>	10 58 Hz / 0.075 mm, 58 150 Hz / 1 g
Vibration resistance during storage acc. to IEC 60068-2-6	5 8.5 Hz / 3.5 mm, 8.5 500 Hz / 1 g
Shock testing	
Shock resistance during operation acc. to IEC     60068-2-27	15 g / 11 ms / 3 shocks/axis
Shock resistance during storage acc. to IEC 60068- 2-29	25 g / 6 ms / 1 000 shocks/axis
Dimensions	
Width	36 mm
Height	285 mm
Depth	281 mm
