General Information	
Extended Product Type:	MS132-0.63T
Product ID:	1SAM340000R1004
EAN:	4013614484940
Catalog Description:	MS132-0.63T Circuit Breaker for Primary Transformer Protection
Long Description:	The circuit breaker for transformer protection MS132-0.63T is a compact 4 5 mm width device designed to protect control transformers on the primary side. This device has a rated operational current of Ie = 0.63 A. It allows fu se-less protection against overload and short-circuit. The short-circuit curre nt setting is fixed to 20 times the rated operational current to handle the hi gh inrush current generated by transformers. The device allows manually c onnect and disconnect the transformer from the mains thanks of its built-in disconnection function. The circuit breaker for transformer protection offers a rated service short-circuit breaking capacity of Ics = 100 kA at 400 VAC a nd a trip class 10. Further features are temperature compensation, trip-free mechanism, rotary handle with a clear switch position indication and short circuit trip indicator. The handle is lockable to protect against unauthorized changes. Auxiliary contacts, signalling contacts, undervoltage releases, sh unt trips, power in-feed blocks are available as accessory.
