

Technical Data Installation and Operating

Din Rail Mountable Switching Power Supply

Ordering Code **BAE003R**

Part Number BAE PS-XA-3Y-24-400-010

Safety notes

Read Instructions!

Before working with this unit, read these instructions carefully and completely. Make sure that you have understood all the information!

Disconnect system from supply network

Before any installation, maintenance or modification work: Disconnect your system from the supply network. Ensure that cannot be re-connected inadvertently!

Before start of operation

Ensure appropriate installation

Warning! Improper installation / operation impair safety and result in operational difficulties or complete failure of the unit. The unit must be installed and put into service appropriately by qualified personnel. Compliance with the relevant regulations must be ensured. Before operation is begun the following conditions must be ensured, in particular:

- Connection to main power supply in compliance with VDE0100 and EN50178.
- With stranded wires: all strands must be secured in the terminal blocks (potential danger of short circuit). Unit and power supply cables must be properly fused; if necessary a manually controlled disconnecting element must be used to disengage from supply mains.
- The non-fused earth conductor must be connected to the "⊕" terminal (protection class 1).
- All output lines must be rated for the power supply output current and must be connected with the correct polarity.
- Sufficient air-cooling must be ensured.
- Use in a pollution degree 2 environment.

In operation: No modifications!

As long as the unit is in operation: do not modify the installation! The same applies also to the secondary side. Risk of electric arcs and electric shock (fatal)!

Only (dis) connect plug connectors when the power is off!

Convection cooling

Do not cover any ventilation holes!

Leave sufficient space around the unit **for cooling!**

See supplementary sheet "Technical Data" and Fig. 1

Warning: High voltage! Store energy!

The unit contains unprotected conductors carrying a lethal high voltage, and components storing substantial amounts of energy. Improper handling may result in an electric shock or serious burn!

- The unit must not be opened except appropriately trained personnel!
- Do not introduce any object into the unit!
- Keep away from fire and water!

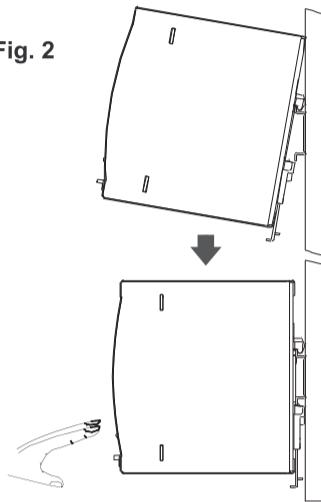

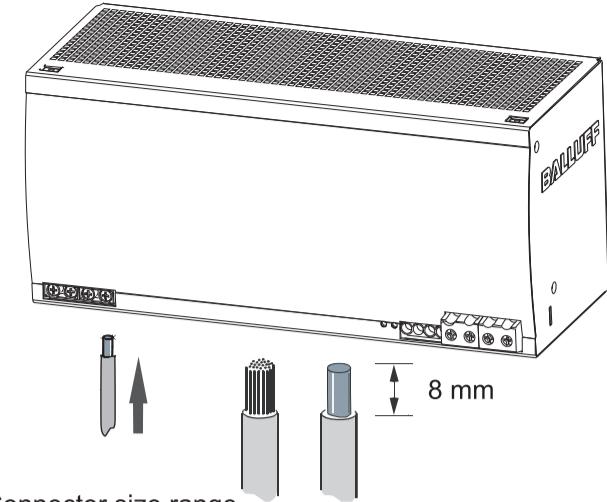

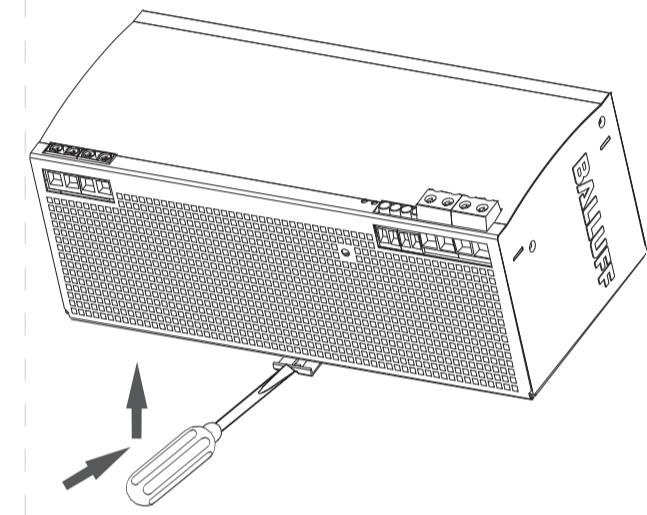

Fig. 3

Connector size range
AWG24 - 10 / 0.2 - 4 mm² Input and Rdy. P. G.
AWG20 - 6 / 0.5 - 10 mm² Output

- Input connector can withstand torque at maximum 9 pound-inches
 - Rdy. P. G. Control connector can withstand torque at maximum 5.5 pound-inches
 - Output connector can withstand torque at maximum 15.6 pound-inches
- Use copper conductors only 60 / 75°C
Max. surrounding air temperature of 50 °C for UL 508

Fig. 4

No. 875441 · Edition 1004; Subject to modification. Replaced Edition 1003

All specifications are typical at nominal line voltage, full load, 25°C. Unless otherwise noted

Technical Data

BAE003R

Part Number

BAE PS-XA-3Y-24-400-010

General

Switching frequency	52 kHz (typ.)
Isolation voltage	3000 VAC / 4242 VDC
Isolation resistance	100 MQ
Power up delay	< 1 s
Ambient temperature	-40 °C ~ +71 °C
Derating	-3.5 % / °C from +61 °C
Storage temperature	-40 °C ~ +85 °C
Relative humidity	20 ~ 95 % RH
Cooling	Free air convection
Dimension (W x L x D)	276.0 x 126.0 x 112.0 mm
Weight	3.4 kg

Input specifications

Input voltage	3 x 400 ~ 500 VAC
Input voltage range	340 ~ 575 VAC / 480 ~ 820 VDC
Rated input current	2.4 A at 340 VAC / 1.5 A at 500 VAC
Inrush current	< 30 A
Line frequency	47 ~ 63 Hz
PFC (passive)	5 A / 500 VAC internal / phase 0.8

Output specifications

Output voltage	24 VDC
Output current	40 Amps
Output wattage	960 WATTS
Voltage trim range	22.5 ~ 28.5 VDC
Output voltage accuracy	0 %, +1 %
Line regulation	± 1 %
Load regulation	single mode ± 1 %, parallel mode ± 5 %
Temperature coefficient	± 0.03 % / °C
Ripple & noise	80 mV
Hold up time	typ. 15 ms at 400 VAC / typ. 30 ms at 500 VAC
DC ON Indicator	Green LED
DC LOW Indicator	Red LED
Parallel modus	Parallel function available
Efficiency	92 %
Rated over load protection	120 ~ 140 %
Over temperature	100 ~ 110°C, detect on heatsink, shut down O/P voltage, recovers automatically after temperature goes down
Output short circuit	Hiccup-Mode

Approval and standards

UL / cUL	UL 508 Listed , UL 60950-1
TÜV	EN 60950-1
CE	EN 55022 Class B / EN 61204-3 Class B
	EN 61000-3-2, EN 61000-3-3, EN 61000-6-2,
	EN 55024
	EN 61000-6-3, IEC 61000-4-2, IEC 61000-4-3,
	IEC 61000-4-4, IEC 61000-4-5, IEC 61000-4-6,
	IEC 61000-4-8, IEC 61000-4-11
