

# The new standard in pump innovation and efficiency

The S-Flex enclosed AC drive, now available  
in Type 12 & Type 3R enclosures

Can one drive deliver unmatched value in installed cost and functionality? It can if it's the AHRI Certified S-Flex™ enclosed AC drive. The most compact unit in its class, the S-Flex drive delivers best in class efficiency for pumps and compressor applications. A complete and economic package, the S-Flex is ideal for use in commercial and residential buildings as well as outdoor applications, such as irrigation.

The S-Flex is now available with standard options for UL Type 12 & 3R enclosures, enabling installation of S-Flex drives in mechanical rooms of commercial buildings as well as irrigation installations for greater flexibility.

# Unmatched flexibility, low harmonics, increased efficiency and value

The AHRI Certified S-Flex™ enclosed AC drive delivers best in class efficiency while reducing harmonics at the source.

Simple graphic terminal allows for easy set up and troubleshooting. Performance is built in with commonly required options like contactor bypass and fire/life safety system interfaces. All provided now in UL Type 1, 12, or 3R enclosures for design flexibility.

## Save Money

Offering unmatched value in installed cost and functionality, the S-Flex drive allows building owners, contractors, consulting engineers, and end users to focus on the essentials of demanding commercial building and irrigation and oil & gas applications.

## Save Space

Our UL Type 1 units are the most compact in their class, the S-Flex enclosed drive saves installation space while delivering the right features for most HVAC and Pumping applications. When space is a concern, we've got you covered. Type 12 units provide protection for outdoor applications in markets, such as irrigation and oil & gas.

## Low Harmonics

The S-Flex enclosed drive uses Altivar 212 which is designed with Reduced Harmonic Technology for IEEE 519 – 2014 compliance.

## Save Time

Because specifying drives can be time-consuming, the S-Flex drive includes the most common requirements for VFD needs/specifications for HVAC, pump, air & gas compressor, fan, and scroll compressor applications.

## Certified Performance

Schneider Electric was the first VFD manufacturer to receive AHRI certification. S-Flex drives featuring the AHRI logo have been certified to AHRI Standard 1210 and are backed by independent data verifying performance.
