## Identification System

Mini-Vario and Vario rotary manual motor-control switches from 12-175 A are suitable for on-load making and breaking of resistive or mixed resistive inductive circuits where frequent operation is required. They can also be used for direct switching of motors in utilization categories AC-3 and DC-3 specific to motors. Vario manual motor-control switches are suitable for isolator applications with fully visible indication (since the handle cannot be in the open position unless all the contacts are actually open and separated by the appropriate isolating distance), and the handles are padlockable.

The Mini-Vario and Vario catalog numbers are described in Table 8.1.

## Vario Non-Metallic Enclosed Switches

The Vario Motor Disconnect Switch is also offered as an enclosed switch. The three-pole version makes the Vario switch ideal for manual motor control applications. They are compact, easy to wire and connect, and come undrilled to allow cable entry positions.
NOTE: VC•GUN enclosures are UL approved.

## Vario Metallic Enclosed Switches

Vario switches meet UL508 requirements as both enclosed and open manual motor controllers. They are also marked "Suitable as Motor Disconnect" allowing installation on the load side of the motor branch circuit short-circuit and ground-fault protection. If motor branch circuit short-circuit and ground-fault protection is needed, use a GS1 or 9422 fusible switch or circuit breaker meeting NEC 430.52 requirements.

## Vario Manual Motor Control Switches

The V1 and V2 come in metallic enclosures (NEMA Type 1, 4, 4X, and 12). The NEMA 1 enclosure comes with conduit knockouts top and bottom. To factory install a VZ7 auxiliary contact in these metallic enclosures, add Form X11 to the end of the catalog number (for example, 9421V1G30X11). To factory install a VZ20 auxiliary contact in these enclosures, add Form X20 to the end of the catalog number (for example, 9421V1W30X20).

## MD Motor Disconnect Switches

The MD motor disconnect switch is listed UL 508 Suitable for Motor Control (UL File E164864) and conforms to IEC standard 60947-3. It is in a compact NEMA 4X enclosure suitable for use in NEMA 1, 3, 3R, 4, 4X, and 12 applications. The MD's key benefits are an extremely small footprint, a more economically efficient NEMA 4X solution, and a handle interlock preventing cover removal when the switch is in the ON position.
Switch features:

- Suitable for NEMA 1, 3R, 4, 4X, and 12 enclosure applications.
- Complies with OSHA lockout/tagout requirements-accepts up to three 8 mm padlocks.
- For accessories, see Table 8.20.

VLS3P016R1VLS3P063R1

## Product Overview

## Compact Size

The three-pole 16-63 A disconnect switches are made up of a single unit body, a mere 36 mm ( 1.4 in .) wide, while those rated $63-125 \mathrm{~A}$ are only 70 mm ( 2.8 in .) wide.

## Accessory Flexibility

Mounting and removal of the fourth pole and add-on blocks are simple and quick operations with no need for tools.

## Certifications

All VLS disconnect switches are certified by cCSAus and are UL Listed for Canada and USA:

- 16-63 A types: certified according to UL 60947-4-1 / CSA 22.2 n $^{\circ}$ 60947-4-1-14 standards
- 63-125 A types: certified according to UL 98 / CSA 22.2 n $^{\circ} 4$ standards

| VLSH3S7RD | For VLS3P063R2-VLS3P125R2, and VLS8M2. Screw mounting. Pistol grip with release, defeatable per 60947-4-1; $\square 7 \mathrm{~mm}$ ( 0.3 in.). IEC IP66. [14] |
| VLSH4S5R | For For VLS3P $\cdots$ R• and VLS3P $\cdots$ D•. Screw mounting. Protruding selector. 48 mm square. $\square 5 \mathrm{~mm}$ (0.2 in.). [12] |
| Black, rotating |  |
| VLSH1S5B | For VLS3P**R• and VLS3P••D•. Screw mounting. Recessed selector. $\square 5 \mathrm{~mm}$ (0.2 in.). [12] |
| VLSH2S5B | For VLS3P $\cdots$ R• and VLS3P...D•. Screw mounting. Protruding selector. $\square 5 \mathrm{~mm}$ (0.2 in.). [12] |
| VLSH2H5B | For VLS3P $\cdots \cdot$ R•, VLS3P063R1, VLS3P016D1-VLS3P040D1. Ring mounting. Protruding selector. $\square 5 \mathrm{~mm}$ (0.2 in.). [12] [13] |
| VLSH2H5BD | For VLS3P $\cdots$ R•. Ring mounting. Protruding selector with release, defeatable per 60947-4-1. $\square 5 \mathrm{~mm}$ (0.2 in.). [12] |
| VLSH2H5BL | For VLS3P•••R•, VLS3P063R1, VLS3P016D1-VLS3P040D1. Ring mounting. Low profile protruding selector, $\square 5 \mathrm{~mm}$ ( 0.2 in .). |
| VLSH2H5BPO | For VLS3P•••R•, VLS3P063R1, VLS3P016D1-VLS3P040D1. Ring mounting. Lock On protruding selector, $\square 5 \mathrm{~mm}$ ( 0.2 in .). |
| VLSH3S7BD | For VLS3P063R2-VLS3P125R2, and VLS8M2. Screw mounting. Pistol grip with release, defeatable per UL60947-4-1; $\square 7 \mathrm{~mm}$ (0.3 in.). [14] |
| VLSH2S5BC | For VLS8C $\cdot$ mechanical interlock mechanism (I-O-II). $\square 5 \mathrm{~mm}$ (0.2 in.). [12] |
| VLSH4S5B | For For VLS3P $\cdots \cdot \mathrm{R} \cdot$ and VLS3P $\cdots \bullet$ D. Screw mounting. Protruding selector. $\square 5 \mathrm{~mm}$ (0.2 in.). [12] |
| Accessories for Rear Mounting Control For VLSH3S7RD and VLSH3S7BD handles. |  |
| VLSHA7 | Adapter, $\square 7 \mathrm{~mm}$ (0.3 in.) for VLS3P063R2--VLS3P125R2. |

VLSH2H5B ( $65 \times 65 \mathrm{~mm}$ )

VLSH4S5B ( $48 \times 48 \mathrm{~mm}$ )

VLSH2S5BC ( $65 \times 65 \mathrm{~mm}$ )

## LK4 and GS2 Disconnect Switches

Table 8.59: Building a Complete GS or LK Switch
To build a complete GS or LK switch, order the following parts:

[^1]For front-mounted contacts order LK4AD30N (front-mounted auxiliary contact holder) + GS2AM110.

## LK4 Nonfusible Disconnect Switches

NOTE: Switches in the shaded area are now available as kits. See Table 8.61.

Table 8.60: LK Nonfusible IEC Style Disconnect Switches

## Disconnect Switches

The 9422 disconnect switches are the ideal selections for the PV String Combiner Box internal disconnect switch and control panel applications. These switches are designed for variable depth, flange mounting, traditional side mounting and bracket mounting applications providing complete flexibility in the PV string combiner box designs. The switches are compatible with 9422A handle operators and 9423 door mechanisms and are UL 98 recognized (E52369 Vol. 1, Sec. 18) and CSA certified. See page 8-34, page 8-37, and page 8-38 for dimensional information.

The 9422 Bracket Mount Disconnect Switch is designed for combiner boxes and control

9422TCN30

Bracket Mounted Disconnect Switch The 9422 Bracket Moun Disconnect Swith is designed for combiner boxes and control panel applications. The Bracket Mount Disconnect Switch is shipped with the switch and external handle assembled to a bracket, ready for quick installation. A protective trim plate is provided to prevent any mounting screws from being accessible from the front. The trim plate also provides an attractive installation feature. The switches are fully compatible with the 9423 closing mechanisms.

[1] See for ordering information for the cable operator.
[2] Variable depth only - no cable operator.
[3] 9422 R2 will extend maximum mounting depth 7 inches, see lable 8.86 for information.
4] Accommodates Class J fuse only.
[5] Switches are fixed-depth or adjustable depending on handle selection.
[6] Commercially available enclosures may not accept 9422TG1 and 2 operating mechanisms. Contact enclosure manufacturer for availability of enclosures for use with these switches.
[7] Right hand flange mounting only and requires a special enclosure.
[8] Variable in increments of 0.63 inches.
[9] Space saving design-Type J fuses mounted on the non-fused bracket.

Handle Information for 9422 Disconnect Switches
The Handle Mechanism Kit contains all parts needed to mount the handle to the flange of the enclosure. Two flange mounting methods are offered. For right or left hand flange mounting use Types A1-A4 and Types A9-A10 kits. For right-hand mounting only, use Type A5-A8 handles. The type AP1 and AP2 handles are used on the PowerPact ${ }^{\text {TM }} \mathrm{M}$ and P operating mechanisms, 9422 RM1 and 9422 CMP. The dimensions are identical to 9422 A1.

9422 A1, A2, A3, A4, A9, and A10 Handles

Rod used only on the variable-depth mechanism

## Handle Mechanisms

These handle mechanism kits are used with the circuit breaker variable depth and cable operating mechanisms. The kits contain all parts necessary for mounting the handle to the flange of the enclosure. Types A1-A4, A1Y, and AP1 are suitable for right or lefthand flange mounting.

NOTE: See Handle Information, page 8-34 for dimensional information.

## Accessories

Class R Fuse Kits
When installed, this kit rejects all fuses except Class R. The kits are available for field installation. With rejection kit and Class R fuses installed, the switch is UL component recognized for use on systems with fault current up to 200,000 RMS symmetrical amperes.

Table 8.78: Class R Fuse Kits

## Internal Barrier Kits

Provides an additional barrier that helps prevent accidental contact with live parts. Fieldinstalled transparent barriers do not restrict visual inspection of the switch. Barriers provide IEC529 IP2X "finger safe" protection when door of enclosed disconnect switch is open. A convenient door allows use of test probes without accessing fuses and replacement of fuses without removing barrier. Barrier must be used with the skirt kit to enclose a panel mounted 9422 disconnect.

Table 8.88: Nonfusible and Fusible Switches

| $\|$Dimension D = Distance from outside of flange to            <br> disconnect switch mounting surface.            <br> For Type TG1 or TG2 with:            <br> Type A7 or A8 adjustable <br> depth handle mechanism            <br> In steps of      D 15.87 <br> 403 to 19 <br> 48   <br>             |
| :--- |

NOTE: Copper lugs are standard on all Type TG disconnect switches.

* $\mathrm{D}=$ Mounting depth measured from the switch mounting surface to the surface of flange.

9421 Type L Circuit Breaker Operating Mechanism

Type L Circuit Breaker Mechanisms
Type $L$ door-mounted, variable depth operating mechanisms feature heavy duty, all metal construction with trip indication. All mechanisms can be padlocked in the Off position when the enclosure door is open. Further, the handle assemblies can be locked Off with up to three padlocks, which also locks the enclosure when the door is closed. (The 3 in. handle accepts one padlock.) Complete kits are rated for NEMA 1, 3R, and 12 enclosures. They include a handle assembly, operating mechanism, and shaft assembly.

| 3 Auxiliary Switch 3a 3b | - | - | $3 \times$ S29450 | $3 \times$ S29450 |

NOTE: The location of the accessory in the circuit breaker determines its function.

NOTE: Refer to NEC Article 430-10 for minimum dimension $X$ from circuit breaker top mounting hole to wall or barrier to ensure adequate wire bending space
NOTE: Bend radius in cable must never be less than 6 inches. Electrical clearances must be maintained between cable and live electrical parts.

Flexible Cable Mechanisms

- For use with Class 9422 handle operators (you must select a 9422A• handle to complete the operating mechanism)
- Specially designed for tall, deep enclosures where placement flexibility is required

Dual Cable Operating Mechanisms for Square $D^{\text {TM }}$ Circuit Breakers
Dual Cable Operating Mechanisms are designed for use with Square D brand PowerPact ${ }^{T M} \mathrm{~B}, \mathrm{D}, \mathrm{H}, \mathrm{J}$, and L circuit breakers through 600 A frame sizes. The cable mechanisms allow for a single handle operator, Class 9422A, to operate both circuit breakers. The cable mechanism is designed especially for tall, deep enclosures where placement flexibility is required. There are numerous cable arrangements to choose from to accommodate many applications.

## Features

- Separate cables for each circuit breaker
- Rugged metal flange handle operator
- Maximized flexibility of circuit breaker placement for existing and new applications
- Control panel can be fed from two separate supply voltages (if required)
- Dual mechanism allows both separate supply voltages to be controlled by a single handle to improve security features

Table 8.95: Dual Cable Operating Mechanisms Selection

| Circuit Breaker Type | Cable Length in. / mm (quantity) | Catalog <br> Number | Frame Size (max.) |

## Handle Mechanisms

These handle mechanism kits are used with the circuit breaker variable depth and cable operating mechanisms. The kits contain all parts necessary for mounting the handle to the flange of the enclosure. Types A1-A4, A1Y, and AP1 are suitable for right or lefthand flange mounting.

Table 8.96: 9422 Disconnect Switch and Circuit Breaker Handle Mechanisms

NOTE: See Handle Information, page 8-34 for dimensional information.

[^4]

Flange-Mounted, Variable-Depth Operating Mechanisms
Designed for installation in custom built control enclosures where main or branch circuit protective devices are required. All circuit breaker operating mechanisms are suitable for either right- or left-hand flange mounting, convertible on the job.
NOTE: The operating mechanisms do not include handle mechanisms. You must select a 9422A• handle to complete the installation.

| Double Pole, Double Throw | 9999R27 |

## Dimensions

Minimum to wall or barrier to insure adequate wire bending space to lug surface when the maximum wire size is used with standard lugs. Refer to NEC 430-10.

Dimensions: in.

[^0]:    [4] For VLS3P016R1-040R1 only
    [5] For VLS3P063R1 only.
    [6] For VLS3P016D1-040D1 only
    [7] For VLS3P063R2-125R2 only.
    [8] For VLS3P063D2-125D2 only.

[^1]:    Example:
    LK4SU3N (600 A non-fusible switch) + GS2AE6 (320 mm Style D shaft) + GS2AH150 (black/black, locking)
    To add auxiliary contacts:

[^2]:    [3] Optional on shafts for LK4DU3CN, LK4GU3CN and LK4JU3CN.
    [4] No longer sold as components. Purchase Kits containing Switch, Handle, Shaft, and Guide Cone as listed in Table 8.61.
    [5] 600-1200 A standard with top shroud.

[^3]:    [6] GS2AH100TO200-GS1 to GS2 Handle Adapter if using GS1 holes.
    [7] Not for use with flange disconnects.
    [8] GS1DU3 and GS1DDU3 switches allow up to 4 auxiliary contacts without adding contact holder GS1AD10. For more than 4 contacts, GS1AD10 is required.
    [9]

[^4]:    [7] Must use the 9422AP1 or 9422AP2 operating handle with this operating mechanism.
    [8] Must use the 9422AP1 or 9422AP2 operating handle with this operating mechanism.
    [9] Use with 30-200 A, 9422 switches and all circuit breaker mechanisms.
    [10] Yellow base with gray handle and red knob.
    [11] Use only with 9422RM1, 9422CMP, and PowerPact $M$ and $P$ operating mechanisms.
    [12] Use with Type D2 remote or dual adapter kit.
    [13] Use only with 400 A, 9422TG1 and 9422TG2 disconnect switch.
    [14] Adjustable depth.
