

Storage Conditions for Terminal Blocks

Scope of application

The following guideline apply to all warehouses and production storage facilities and cover all terminal blocks and accessories. Any exceptions that may apply are described in these guidelines.

Storage conditions for Terminal Blocks

- The storage facility should be located in an enclosed space
- No drafts (open doors or windows)
- Relative humidity: 40 - 70 %
- Storage temperature range: 10 – 30 °C
- Materials that emit corrosive vapors shall not be stored in the same area
- Stored items must always be stored in the provided containers and packaging
- Partial quantities must be adequately protected with dust covers or packaging material

Storage period

The storage period of terminal blocks is 12 months.
